

MICROGREEN SANGRIA

SANGRIA is a purple radish bred specifically for sprouting and microgreen production.

SANGRIA is a pure seed line with very low numbers of off-types (green cotyledons) common in many alternative varieties.

With a subtle flavour, **SANGRIA** will add colour and vibrancy to green dominated sprout and microgreen mixes.

VARIETY FEATURES

- Dark purple cotyledons
- Dark purple stems
- Moderate radish flavour

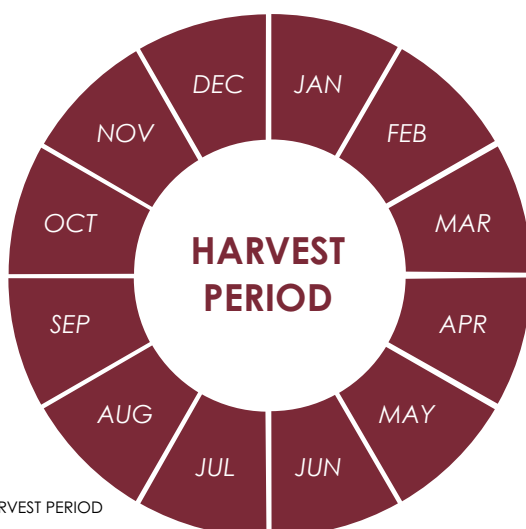

PACK SIZES

500G, 5KG, 10KG

Untreated seed

All our microgreen seeds are untreated.

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/management practices, climate, soil type and geographic location.
