

GREY PUMPKIN MERCURY

MERCURY has a more blocky fruit shape and larger fruit size than other current market standard grey pumpkin varieties. In the Sampson class but with a lighter grey skin, **MERCURY** is less susceptible to sunburn and fruit pinking important for the visual display of an attractive fruit.

With a bigger fruit, excellent internal flesh colour and a small seed cavity, **MERCURY** is well suited to the cut pumpkin market. A semi-bush type plant. **MERCURY** is a reliable producer of high yields of quality fruit.
