

SQUASH GEM ZULU

ZULU is a hybrid gem squash which has excellent yield potential and fruit quality combined with an early maturity and disease resistances. Fruit are produced on a vigorous, compact plant with short internodes which allows for higher plant densities.

Fruit shape of **ZULU** is round from fruit set thereby enabling fruit to be harvested at a 'baby' stage as well as for 'mature' production. A key feature of **ZULU** is the fruit quality with excellent colour retention of the skin compared to other varieties, and the shipping and storage ability.

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds (NZ) Ltd cannot accept liability as to accuracy of this information.

VARIETY FEATURES

- Gem squash variety
- 300g average fruit weight
- Dark green skin colour

AGRONOMIC CONSIDERATIONS

- A hybrid variety
- Early to mature
- Produces a compact plant with short runners which enables higher plant densities per hectare and easier crop management

PACK SIZES

1M, 5M, 25M

DISEASE RESISTANCES

Intermediate Resistance: ZYMV, Px
