

ZUCCHINI SPECIALTY YELLOW BALL

A novelty for specialty zucchini production, **YELLOW BALL** produces attractive small round fruits that would be of interest for growers supplying to high value markets that are seeking a novel product of quality and a taste experience.

YELLOW BALL has a strong bush with an upright and open habit assuring multiple harvests and easy picking. Edible 35-40 days after sowing, the fruit should be harvested when young for best eating.

VARIETY FEATURES

- Yellow fruit colour
- Round fruit shape
- Good vigour and open plant habit

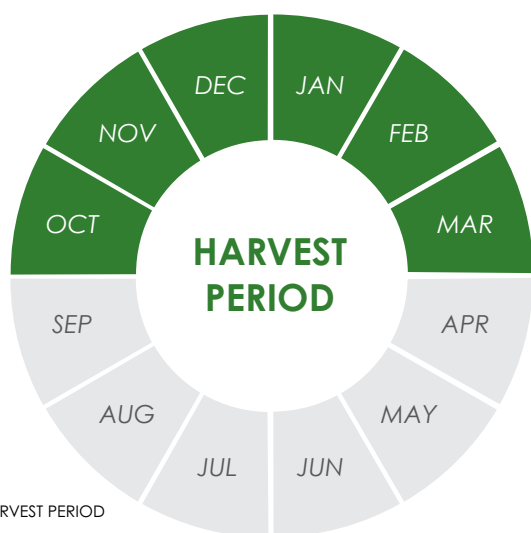

AGRONOMIC CONSIDERATIONS

- A hybrid variety
- Care is required when handling the fruit due to marking showing up more clearly on the yellow skin
- Most squash growers have at some stage experienced problems with greening or spotting in yellow scallopini or zucchini varieties. There are two main reasons - heat stress and virus. It is recommended growers maintain a high level of insect control
