

MICROGREEN SOPHIE

SOPHIE is a sunflower seed suitable for sprouting and microgreen production. Producing attractive oval cotyledons of a mid green colour, **SOPHIE** adds a unique nutty flavour to any microgreen mix or as a unique stand-alone product. High quality seed ensures even germination for a uniform microgreen or sprout product.

VARIETY FEATURES

- Mid green cotyledons
- White stem
- Mild nutty flavour
- 10-15 day germination

PACK SIZES

500G, 5KG, 10KG

Untreated seed

All our microgreen seeds are untreated.

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/management practices, climate, soil type and geographic location.
