

# LETTUCE COS MAXI

## GREEN GOBLIN

**GREEN GOBLIN** is a full sized, mid-green cos suitable for whole head harvest. It has a very wide harvest window and may, in some situations – particularly Northern areas, be grown yearround. **GREEN GOBLIN** has thick, blistered leaves and is quite large framed, with a wide butt making it an excellent option for sleeving. When grown in warmer conditions **GREEN GOBLIN** shows good tolerance to tipburn and bolting. In cooler conditions **GREEN GOBLIN** will gain full size with no twisting and produces a heavier head due to high leaf numbers. During periods of heavy rain **GREEN GOBLIN** shows strong field tolerance to anthracnose, resulting in clean heads.

 HARVEST PERIOD

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds (NZ) Ltd cannot accept liability as to accuracy of this information.

### VARIETY FEATURES

- Mid-green colour
- Large cos size
- Medium vigour

### AGRONOMIC CONSIDERATIONS

- Suitable for field production
- Strong tolerance to tipburn
- Strong tolerance to bolting

### PACK SIZES

1M, 5M, 25M

### DISEASE RESISTANCES

High Resistance: Bl:16-24, 27, 28, 30-32
