

LETTUCE COS MINI ROSETTA

ROSETTA is a 'buttercos' type, red lettuce suitable for both the whole head and leaf markets and, as the name suggests, grows in a rosette style providing a very high number of uniform, round to oval shaped leaves which maybe be used as either a cos leaf or butterhead leaf in salad mixes.

ROSETTA is extremely versatile and it is likely it will be able to be a year round variety in most areas. **ROSETTA** produces leaves of medium thickness which give excellent shelf life, the reverse cup and half red/ half green leaf giving shape and texture.

ROSETTA is suitable for production in both the field and hydroponics and is very strong against both tipburn and bolting. **ROSETTA** has a strong disease package with excellent mildew cover.

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds (NZ) Ltd cannot accept liability as to accuracy of this information.

VARIETY FEATURES

- Double red colour
- Medium head size
- Medium vigour

AGRONOMIC CONSIDERATIONS

- Suitable for field production and hydroponic systems
- Strong tolerance to tipburn
- Strong tolerance to bolting

PACK SIZES

1M, 5M, 25M, 100M

DISEASE RESISTANCES

High Resistance: Bl:1-37
