

BABYLEAF MUSTARD

XENA

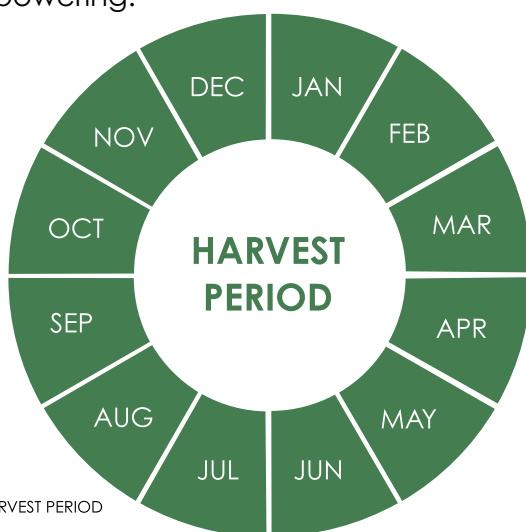

XENA is a serrated mizuna leaf that is mid-dark green in colour.

XENA differs from standard mizuna in that it has a thicker leaf due to slightly slower growth, making it an ideal warm season variety. Although particularly suited to warm season **XENA** can be grown year-round and provides better shelf life than many standard mizuna lines.

XENA adds texture to salad mixes and the leaf shape gives good bulk to pillow packs.

XENA has a mild brassica flavor and is not overpowering.

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds (NZ) Ltd cannot accept liability as to accuracy of this information.

VARIETY FEATURES

- Mid-dark green leaves
- Serrated leaves in the traditional mizuna style
- Slower growing producing thicker leaves.

AGRONOMIC CONSIDERATIONS

- Best results obtained when grown in warmer conditions
- Strong tolerance to bolting.

PACK SIZES

1KG, 5KG, 10KG
