

# MICROGREEN EDO

**EDO** is a purple shiso for both microgreen and full size herb production.

Purple shiso is a common Asian herb which is often referred to as Perilla.

**EDO** produces a fragrant aniseed flavour which is slightly less spicy than its green counterpart.

As a microgreen, **EDO** produces deep purple leaves. When left to mature into a herb,

**EDO** has pointed oval shaped leaves with a frilly leaf margin.

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds (NZ) Ltd cannot accept liability as to accuracy of this information.

## VARIETY FEATURES

- Deep purple leaf
- Mild aniseed flavour
- Suitable for both herb and microgreen production.

## AGRONOMIC CONSIDERATIONS

To maintain germination shiso needs to be stored at a cooler temperature than standard seed varieties. We recommend storing as close to 0 degrees Celsius. *Please note this variety requires light to germinate.*

## PACK SIZES

500G, 5KG, 10KG

## Untreated seed

All our microgreen seeds are untreated.
