

# MICROGREEN OLLIE

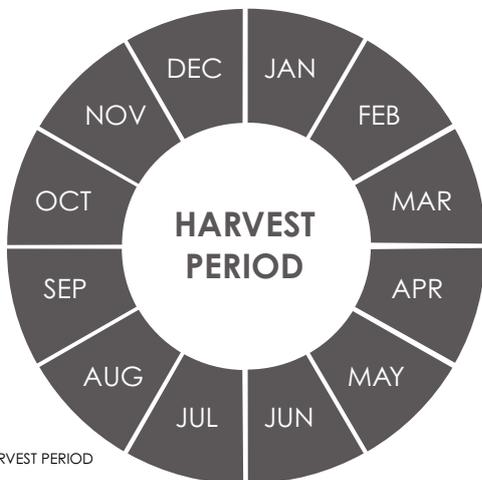

**OLLIE** is a high quality onion for sprouting production.

**OLLIE** produces sprouts that are thin, long and delicate, that often curve and fold in various directions as the sprout lengthens.

When grown as a sprout, **OLLIE** produces bright white shoots but when left to mature to a microgreen size, sprouts are a bright, lush green. It is common for the seed to remain attached to the microgreen at maturity.

Onion sprouts produce a robust, sweet, nutty flavor that lacks the strong pungency of mature onion bulbs.

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds (NZ) Ltd cannot accept liability as to accuracy of this information.

## VARIETY FEATURES

- Bright white sprouts
- Sweet, nutty flavour
- Vibrant green stems when left to mature to a microgreen size.

## PACK SIZES

500G, 5KG, 10KG

## Untreated seed

All our microgreen seeds are untreated.
