

WATERMELON ROOTSTOCK BARRIER

BARRIER is a true watermelon rootstock that is compatible for grafting with seeded, micro-seeded or seedless watermelon.

BARRIER provides improved *Fusarium* resistance to the melon scion to which it is grafted.

BARRIER is more efficient to grow than other rootstock types and does not impart a bitter aftertaste to the watermelon fruit.

BARRIER contributes to greater flesh firmness and density.

VARIETY FEATURES

- True watermelon rootstock
- Very efficient to grow
- No bitter aftertaste
- Upright plant habit
- Powerful root system.

AGRONOMIC CONSIDERATIONS

- Compatible with melon, watermelon and cucumber
- Suitable for use in heated and non-heated growing environments.

HYBRID VARIETY

PACK SIZES

10M, 50M, 100M

DISEASE RESISTANCES

Intermediate resistance: Fob:1,2

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/management practices, climate, soil type and geographic location.
