

ROCKMELON CARLTON

A vigorous variety, **CHARLTON** produces a high quality, high yielding crop early in the season.

The fruit are produced on an open plant and **CHARLTON** has a healthy vine with high resistance to Fusarium and intermediate resistance to powdery mildew.

For an early season rockmelon, the fruit of **CHARLTON** are highly uniform with a full net, sutures and a rind that turns yellow at maturity.

The internal quality of the fruit is exceptional with a dark orange flesh and good firmness.

VARIETY FEATURES
