

# PAK CHOI SUMO

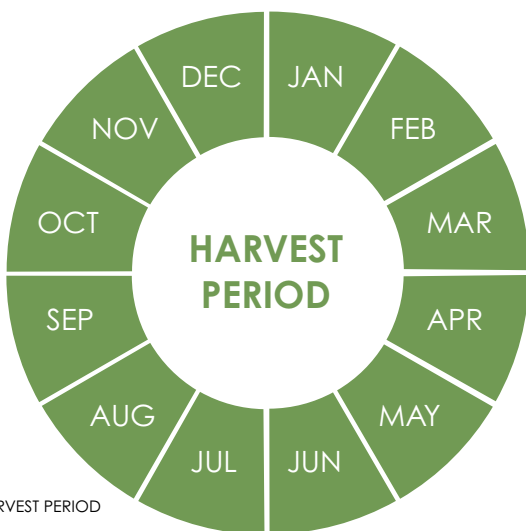

**SUMO** is a green-stemmed pak choi (also known as pak choy, bok choi or bok choy) variety that is very slow bolting.

With wide adaptability, **SUMO** is able to be grown in most areas of New Zealand with quality heads being produced for year-round harvesting.

A hybrid variety, the heads produced are highly uniform in regards to head size, shape and maturity, which makes for ease of harvesting with one pass possible.

A compact and dense head with dark-green petioles and leaves.

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds (NZ) Ltd cannot accept liability as to accuracy of this information.

## VARIETY FEATURES

- Superior bolting tolerance
- High cut out
- Exceptional quality.

## AGRONOMIC CONSIDERATIONS

Suitable for both field and hydroponic production.

## HYBRID VARIETY

## PACK SIZES

10M, 100M, 1,000M

## UNTREATED SEED

Available as untreated seed.
