

# LETTUCE ICEBERG

## BANDITO

**BANDITO** is a vigorous cool/cold season variety suited for harvesting in the heart of winter and on in to early spring.

**BANDITO** is suited to slotting prior to Matador - in northern regions cutting from early July. It crosses over in to the Matador slot from mid-august and on in to early September.

**BANDITO** does not puff up in early, warm spring conditions. A sure-heading type, **BANDITO** has a lightly blistered leaf with very high leaf numbers which provide good frost protection.

**BANDITO** produces a very uniform crop with round heads that sit up off of the ground allowing for ease of harvest and very few head rots.

**BANDITO** has excellent internal characteristics and a reasonable core. **BANDITO** has shown excellent tolerance to mildew and anthracnose.

### VARIETY FEATURES

- Large head size
- Strong vigour
- Winter and early spring harvest.

### AGRONOMIC CONSIDERATIONS

- Strong tolerance to anthracnose
- Medium tolerance to bolting.

### PACK SIZES

10M, 25M, 100M

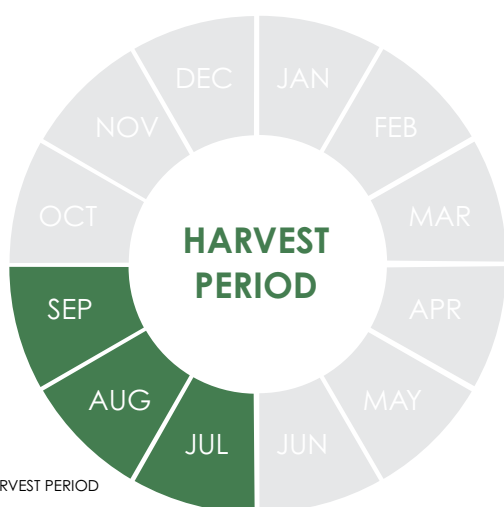

### DISEASE RESISTANCES

Intermediate Resistance: Bl.1-37

### UNTREATED SEED

Available as untreated seed.
