

LETTUCE ICEBERG

SAHARA *Nr*

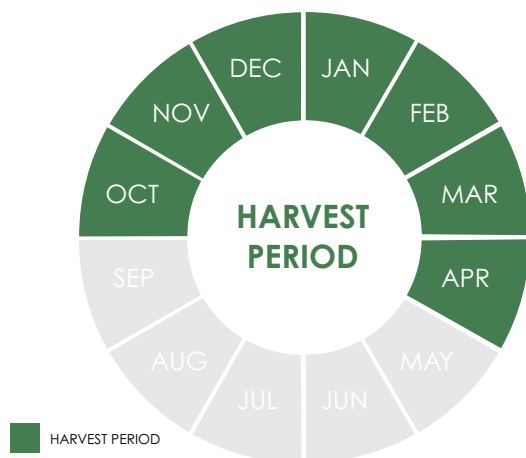

SAHARA is a larger framed iceberg which produces medium sized heads through the warmer months.

SAHARA performs well in central areas (Horowhenua/ Nelson) as a late spring/early summer harvest variety and in more northern regions from the heat of summer out into the end of autumn.

SAHARA shows strong tolerance to bolting and the larger frame gives it plenty of vigour in the transition from the heat of summer into the cool of autumn.

SAHARA is up-to a week later to mature than current market standards in the heat of summer due to its large frame but will produce a very high cut out rate.

Due to its versatility many growers will find a wide, warm season, window for **SAHARA**.

VARIETY FEATURES

- Mid-green head colour
- Medium head size
- Strong vigour and medium-large frame.

AGRONOMIC CONSIDERATIONS

- Fusarium resistance Fol.(1)
- Strong tolerance to tipburn
- Strong tolerance to bolting.

PACK SIZES

10M, 25M, 100M

DISEASE RESISTANCES

High Resistance: Bl.1-40, Fol(1) Nr:0

UNTREATED SEED

Available as untreated seed.
