

# CAULIFLOWER BODILIS

**BODILIS** has been a proven performer best suited to the variable conditions of the shoulder period. **BODILIS** produces a very upright frame of medium to large size with an excellent series of wrapper leaves that serve to protect a medium sized curd of brilliant white colour.

**BODILIS** does well in both the wetter, warmer conditions experienced in the North and the drier, colder conditions in more southerly locales. **BODILIS** produces an evenly maturing crop with very uniform curds.

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds (NZ) Ltd cannot accept liability as to accuracy of this information.

## VARIETY FEATURES

- Medium head size
- Bright white head colour
- Excellent curd cover
- Strong vigour
- 14-16 weeks to maturity autumn and spring harvesting.

## AGRONOMIC CONSIDERATIONS

Good tolerance to hollow stem.

## HYBRID VARIETY

## PACK SIZES

2.5M, 10M, 50M

## UNTREATED SEED

Available as untreated seed.
