

# LETTUCE COS MINI YUCATAN

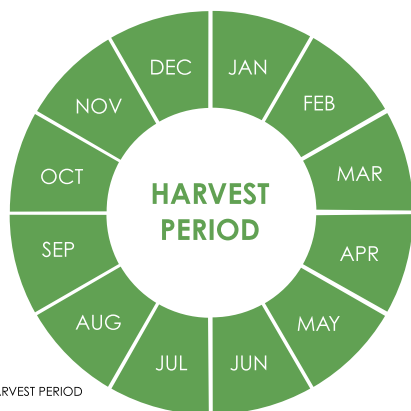

**YUCATAN** is a small-to-medium sized crispy cos, suitable for both whole head harvest and processing.

**YUCATAN** is a 2nd generation crispy cos type and is ideally suited to warm season production but has a very wide growing window and will be able to be harvested year round in Northern areas.

**YUCATAN** has strong tipburn and bolting tolerance in warmer conditions. It is strong against twisting in cooler, low light conditions.

**YUCATAN** can be considered an improved Durango type. The internal leaves are a uniform, light-green colour and a very short core means less waste. Leaves can be used whole or chopped where their crisp texture remains intact longer than traditional style cos.

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds (NZ) Ltd cannot accept liability as to accuracy of this information.

## VARIETY FEATURES

- Dark-green colour
- Mini cos size
- Medium vigour.

## AGRONOMIC CONSIDERATIONS

- Suitable for field production
- Strong tolerance to tipburn
- Strong tolerance to bolting.

## PACK SIZES

1M, 5M, 25M
