

HERB CHIVE CHASER

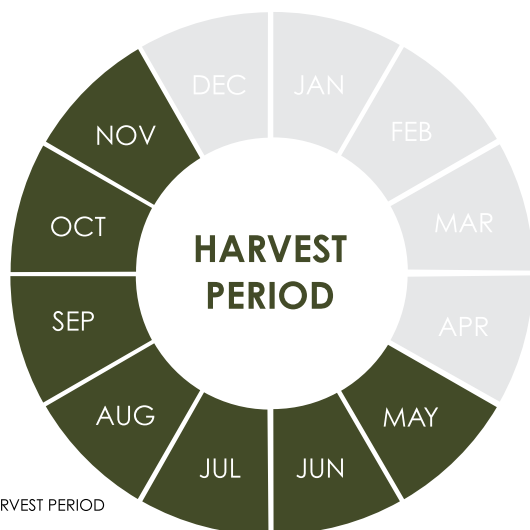

CHASER is an attractive, dark green chive suited for potted and cut production during the cooler months.

CHASER produces uniform, refined stems which maintain their upright growth habit when grown both hydroponically and in the field.

This variety processes well and has good tolerance to brown tips and rust.

CHASER has good regenerative capabilities making it a highly versatile variety.

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds (NZ) Ltd cannot accept liability as to accuracy of this information.

VARIETY FEATURES

- Dark green leaf colour
- Medium-broad leaf
- Vigorous and erect plant habit.

AGRONOMIC CONSIDERATIONS

Suitable for open field or hydroponic production systems.

PACK SIZES

100G, 1KG, 5KG

UNTREATED SEED

Available as untreated seed.

Suitable for cut and process production.
