

HERB BASIL FREDDA

FREDDA is a high quality basil for both pot and cut production. **FREDDA** produces smaller, flatter leaves than the traditional Genovese varieties but still remains an extremely high yielding variety.

This variety produces a high number of very uniform leaves which are pleasantly aromatic and lack the bitter aniseed flavour.

FREDDA can be grown year round but is slightly faster to mature than our summer variety Caldo making it a good option for winter production under cooler conditions and lower light levels.

VARIETY FEATURES

- Dark-green leaf
- Smaller, flatter leaves
- High yielding
- Compact and upright plant.

AGRONOMIC CONSIDERATIONS

- Cool season production
- Suitable for hydroponic production systems.

PACK SIZES

100G, 1KG, 10KG

Suitable for potted production.

Suitable for cut and process production.
