

# MICROGREEN ASPEN

**ASPEN** is a green shiso for herb and microgreen production.

**ASPEN** produces bright green leaves that are smooth, flat, wide and have a central, prominent vein that branches into a few small veins across the surface.

When grown as a micro, **APSEN** is highly aromatic, tender, and offers a slightly earthy flavour.

## VARIETY FEATURES

- Bright green leaf
- White stem
- Earthy flavour.

## AGRONOMIC CONSIDERATIONS

To maintain germination shiso needs to be stored at a cooler temperature than standard seed varieties. We recommend storing as close to 0 degrees Celsius.

*Please note this variety requires light to germinate.*

## PACK SIZES

500G, 5KG, 10KG

## UNTREATED SEED

All our microgreen seeds are untreated.

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds (NZ) Ltd cannot accept liability as to accuracy of this information.
