

# GREY PUMPKIN GREYSTONE

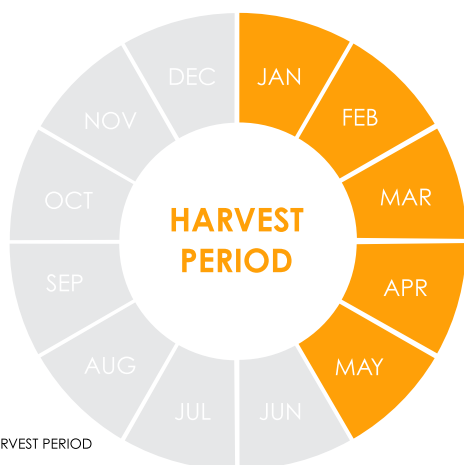

**GREYSTONE** is a large-fruited, grey-skinned pumpkin.

This variety is a great option for processors as it produces high yields of fruit between 3-6kg.

The deep shoulder and minimal skin ribbing, in conjunction with a small seed cavity, assist high recoveries.

The flesh colour is a very dark orange, a defining feature of **GREYSTONE**.

**GREYSTONE** has the advantage of very little pink skin discolouration during storage and will hold well after harvest.

The information provided here is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions, including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds (NZ) Ltd cannot accept liability as to accuracy of this information.

## VARIETY FEATURES

- 3-6kg fruit weight
- Dark-orange internal flesh colour
- Lightly ribbed with a deep shoulder
- Great storage capacity post-harvest (without pinking).

## AGRONOMIC CONSIDERATIONS

120 day maturity.

## HYBRID VARIETY

## PACK SIZES

1M, 5M, 25M

## UNTREATED SEED

Available as untreated seed.
