

BABYLEAF ROCKET ORION

ORION is a warm season, hybrid, wild rocket with dark leaves. It suits both covered and field production through summer and autumn. **ORION** does well in a generally hot climate but shows good cool tolerance also.

ORION is a slow-bolting rocket that is quick to mature. It produces thick, indented leaves and comes from a stable of very strong, European breeding. **ORION** is complemented by Artemis which is best suited to shoulder production.

VARIETY FEATURES

- Dark-green colour
- Light-green stem colour
- Lobed leaf shape
- Serrated leaf margins
- Erect growth habit
- Strong rocket flavour.

AGRONOMIC CONSIDERATIONS

- Slow bolting Wild rocket for warm season production.
- Suitable for open field or hydroponic production systems.

HYBRID VARIETY

PACK SIZES

1KG, 5KG, 10KG
