

CHINESE CABBAGE BOULDER

BOULDER is a clubroot resistant wong bok with good bolting tolerance for warm season production.

Producing dense, well-filled, dark green heads with a bright yellow internal, **BOULDER** is very uniform in regards to head size and forms classic barrel-shaped heads.

Slower to bolt than our market standard Matilda, this variety has good tip burn tolerance and is strong against sclerotinia in the field.

A full sized wong bok, **BOULDER** is an excellent choice for growing requiring strong bolting tolerance and clubroot resistance.

VARIETY FEATURES

- Full sized wong bok
- Classic barrel-shaped head
- Dark green colour
- Dense yellow internal
- Slow bolting.

AGRONOMIC CONSIDERATIONS

- Strong tolerance to tipburn
- Strong tolerance to Sclerotia
- Clubroot resistant.

PACK SIZES

10M, 50M, 100M
